

Abhay Nepal

Nationality: Nepalese **Date of birth:** 16/08/1999  **Phone number:** (+977) 9846927983

 **Email address:** abhay.nepal.9@gmail.com

 **Whatsapp Messenger:** 9846927983

 **github:** github.com/abhaynepal

 **LinkedIn:** www.linkedin.com/in/abhay-nepal

 **Home:** Nepal, 44600 butwal (Nepal)

ABOUT ME

Results-oriented Software Engineering Professional with 3+ years of commercial experience specializing in robust **Java microservices, API troubleshooting, and L3 production support environments**. Awarded a merit-based scholarship after ranking in the top 2.5% among approximately 16,000 applicants in the IOE Pulchowk Campus entrance examination. Proven track record of **taking ownership of critical production incidents, performing detailed root cause analysis (RCA), and managing end-to-end release processes under strict operational SLAs**. Demonstrates strong log analysis and problem-solving skills, with extensive domain experience handling complex payment and roster file integrations.

PROJECTS AND SKILLS

TECHNICAL SKILLS

- **Production Support & Logging: Root Cause Analysis (RCA)**, Log Analysis, **Honeycomb (Structured Logging)**, Kibana, Elasticsearch, YourKit.
- **Core Languages & Frameworks:** Java (Core Java, Java 17, Enterprise capabilities), Spring, Spring Boot 3.5, Hibernate/JPA, Enterprise Computing
- **Architecture & APIs: Microservices Architecture, API Troubleshooting (REST, JSON)**, Java Design Patterns, Data Structures & Algorithms.
- **Databases & Tools:** RDBMS (PostgreSQL/PSQL), Elasticsearch, Kafka, Docker, Kubernetes, Git/GitHub, Jira
- **Incident & Release Management: Jira (Ticket & SLA Tracking)**, Agile/Scrum, CI/CD (CircleCI), Release Ownership
- **Testing & Observability:** Unit Testing (JUnit), Integration Testing, Mockito, **End-to-End Testing (Cypress)**, Honeycomb (Structured Logging), YourKit, Kibana.
- **Domain Knowledge:** US Healthcare (Insurance Claims, Eligibility), HIPAA Compliance, Secure EDI ETL Pipelines

Fullstack Project – Rantit | Java 17, Spring Boot 3.5, React, Docker

Designed, developed, and deployed a containerized microservice-ready web application using modern Spring Boot and React architectures, hosting components across cloud platforms.

Tools

- Elastic search
- Jasper Soft
- Postman
- Yourkit
- IntelliJ
- Kibana
- Jrebel

SOFT SKILLS

- Time management
- Communication skill
- Presentation Skill
- Team work
- Active Learning

Text Summarization using LSA and Transformers - University Major Project

Implemented complex Data Structures, NLP algorithms, and feature extraction techniques to assess machine learning model efficacy via quantitative metrics.

Weighted Ensemble Sentiment Classification (SVM + Naïve Bayes) - University Minor Project

- Designed a complete NLP preprocessing pipeline and developed an adaptive ensemble system using SVM and Naïve Bayes classifiers, achieving a 90.53% classification accuracy.
- Evaluated complex data classification configurations and explored scalable ensemble-learning approaches applicable to product reviews and customer feedback.

WORK EXPERIENCE

 **Viveka Services** – Sanepa, Nepal

Mid Level Software Engineer

[05/2025 – Current]

- **L3 Production Support & Incident Management:** Took absolute ownership of critical production incidents, proactively leading initial investigation, **detailed root cause analysis (RCA), and response efforts as the primary point of accountability during operational failures.**
- **API & System Integration:** Architected, designed, and **troubleshoot complex API integrations** with a third-party payment vendor (Zelis), ensuring seamless end-to-end data transmission and file parsing
- **Defect Resolution & Testing:** Spearheaded a code-quality initiative that drove unit/integration test coverage from 20% to 80%; implemented automated end-to-end verification suites to radically reduce post-release production defects
- **Release & Change Management:** Owned and managed the end-to-end release process for the team; tracked all development and support tickets, verified code-level patches, and coordinated safe production deployments
- **Architecture & Design:** Architected and designed critical client integration pipelines (such as the Zelis payment vendor platform) and a secure EDI file transfer system utilizing full ETL pipelines.
- **Technical Leadership:** Actioned informal Tech Lead responsibilities; led design and architecture discussions, mentored engineering peers, and maintained overarching system design decisions.

 **Viveka Services** – Sanepa, Nepal

Associate Software Engineer

[10/2023 – 05/2025]

- **System Refactoring:** Revamped complex production ETL pipelines to V2, yielding a 30% increase in processing efficiency and operational performance.
- **Testing Automation:** Authored comprehensive Unit Tests and Integration Tests for mission-critical components, significantly lowering production code defect rates.
- **Data & Search Optimization:** Leveraged Elasticsearch to optimize and enhance platform search results while engineering automated data quality and insight reporting tools
- **Cross-Functional Collaboration:** Partnered closely with Business Analysts and cross-functional teams to build high-availability solutions for client-facing software applications.
- **Generated automated data quality and insight reports** to analyze member composition, dependents, and eligibility status from incoming datasets.

- **Claim Payment integration** with a third party payment vendor **Zelis**.
- **Maintain accurate documentation of code** changes, ensuring smooth hand offs between team members.

 **FreeLance** – United States

Freelance Technical Mentor – Software Engineering

[02/2025 – 03/2026]

- **Modern Stack Mentorship:** Mentored international software teams at organizations like RB Globals and SolarWinds on containerization, scalable architectures, and deployment infrastructure.
- **CI/CD & Cloud Infrastructure:** Guided the construction of trunk-based CI/CD pipelines with CircleCI, real-time streaming data pipelines via Kafka, and cloud deployments on Kubernetes.

 **Viveka Services** – Sanepa, Nepal

Software Engineering Intern

[06/2023 – 10/2023]

- **Developed, parsed, and sanitized** complex data files using **Spring and Spring Boot frameworks**.
- Utilized version control systems like **Git** effectively managing changes over time allowing for seamless
- Investigated, debugged, and resolved production application functionality defects.
- Demonstrated time management, organizational, prioritization and planning skills by successfully

EDUCATION AND TRAINING

Bachelor's Degree in Electronics, Communication and Information Engineering

Institute Of Engineering , Pulchowk Campus, TU - Kathmandu [01/01/2018 – 01/01/2023]

City: Kathmandu | Country: Nepal | Website: <https://pcampus.edu.np/>

Relevant Coursework: Data Structure & Algorithm, Database Management Systems, Object-Oriented Software Engineering, Enterprise Computing, Operating Systems, Computer Networks

Intermediate Level - Science

Paramount Boarding High School [01/01/2015 – 01/01/2017]

City: Butwal | Country: Nepal

LANGUAGE SKILLS

Mother tongue(s): Nepali

Other language(s): English: Fluent (Academic IELTS Score: 7)
